Thesis

Analyzing The Motivation and Perception of Domestic and Foreign Participants in Participating the Sport Tourism Event Borobudur Marathon 2017

The objective of this research is to analyze the motivation and perception of domestic and foreign participants in participating the sport tourism event Borobudur Marathon 2017. This is a quantitative descriptive research using the outer model loading factor analysis, comparative independent t-test and also descriptive statistics. The measurement scale being used to measure the motivation is The Marathon Motivation Scale (MOMS) by Zach *et al.* (2015). While the perception is being measured using The Sport Event Evaluation Scale by Kaplanidou and Vogt (2010). The finding of this research is that the most dominant factor of motivation is the *pyschological coping*. Moreover, there are no significant differences founded between the motivation of domestic and foreign participants. Whereas with perception, findings showed that there are indeed significant differences between the domestic and foreign participants.
